SOFTWARE DEVELOPER

Front-End / Software Developer with **5+ years** of commercial experience building customer-facing web and mobile applications across start-ups, SaaS, digital agency and enterprise environments.

Strongest across **React, TypeScript** and **Flutter** delivering greenfield products, modernising legacy applications, building reusable component systems and integrating REST APIs and third-party services. Comfortable working closely with Product, Design and Backend teams and taking features from requirements through to production. Particularly interested in product-focused Software Developer roles where I can combine strong frontend engineering with broader software engineering principles.

Skills

AI - Claude Code, ChatGPT

Languages & Frameworks - React, Typescript, Vue, Flutter, Dart, Javascript, SCSS, LESS, CSS3 (BEM), HTML5, MaterialUI, Bootstrap, ASP.NET MVC5, MJML email framework

Tooling & CI/CD - Vite, Webpack, Storybook, Netlify, Codemagic, Firebase, Figma, BrowserStack, Miro, Notion, Git, Jira, Google Cloud Platform

Observability & Feature management - LaunchDarkly, Posthog, Datadog, Hotjar

Content Management Systems - Kentico, Umbraco

Professional Experience

Flip Insurance | Sydney

Front-end Developer

09/2023 – 05/2026

- Supported upwards-trending insurance sales since 2023 by delivering business-critical purchase journeys, product experiments and A/B tests on browser (**React, Typescript**) and **iOS/Android** mobile app (**Flutter, Dart**).
- Accurately translated **Figma** designs into responsive **React** and **Flutter** reusable components integrated with **REST** backend APIs and external services including Stripe, Google Maps JavaScript API, Box file uploads, Datadog and Okta.
- Improved overall app stability through key architectural uplifts to foundation state management in React (**Redux, state machine, Tanstack Query, custom hooks**) and Flutter (**service locators, RxDart streams, Provider MVVM patterns**) following best practice engineering principles.
- Achieved +80 NPS scores by expanding web and mobile user experience, which included an extensible mobile-first insurance claims lodgement flow, a QR-code driven purchase registration feature using **React, Flutter**.
- Built customer-facing quote & purchase journey in React/TypeScript for HCF's [greenfield funeral insurance pilot](#), partnering with product, marketing, and backend engineering. Achievements included a rebuild of HCF's **atomic design component system** and a **custom authentication** flow built on Okta.
- Improved security, performance and uptime across three React codebases by owning migration from legacy **Webpack to Vite**, patching **npm** vulnerabilities, adding **software composition analysis** to CI/CD.
- Integrated **Claude Code** into spec-driven development workflows to accelerate feature delivery and **Vitest** component test generation.
- Used **MCPs** with **Claude Code** to derive specifications from 3rd party tooling (Miro, Figma, Jira, Notion) and established sensible code quality guardrails with **skills & Claude.md** artefacts.

Yabbr | Brisbane

Front-end Developer (Role made redundant)

10/2022 – 06/2023

- Revamped the entire customer-user experience across the core product suite using **Bootstrap** utility framework, **Socket.io** and **Vue**. The product suite is an omnichannel chat-email-phone communication platform and customer administration portal.
- Migrated core product suite from **Vue 2 to Vue 3** and delivered refactoring to improve developer experience on the core product suite codebase.
- Built UI for a greenfield CRM with **Vue**, **Bootstrap** which included custom data visualisations using **Chart.js** to enable B2B clients to manage complex streams of their customer traffic data.
- First point-of-call for online enquiries and funnelled customer feature requests and production issues to the engineering product roadmap for prioritisation.

Dye & Durham Australia | Brisbane

Junior Software Developer (Role made redundant)

07/2021 – 08/2022

- Built a greenfield cross-platform **Flutter** interface and atomic design system components for a B2B document verification service supporting Australian government-issued document types as part of a legal practice product suite.
- Delivered bug fixes and **Flutter** feature releases within a **Kubernetes** microservices-based cloud environment.
- Collaborated with product managers, scrum master and other development squads through **agile** ceremonies to scope requirements and coordinate feature deliveries.

Zeroseven Digital Agency | Brisbane

Front-end Developer

01/2020 – 11/2020

- Built **responsive, WCAG 2.0-compliant** reusable UI components to design & SEO specifications using **Javascript (ES6), JQuery, LESS, HTML5, ASP.NET MVC5 Razor views** and **macro expressions** for websites powered by **Kentico** and **Umbraco CMS**.
- Under the directions of project manager and senior developer, I helped clients in **face-to-face training sessions** to become confident in leveraging Umbraco CMS functionalities to meet their business and marketing needs.
- Built browser-compatible email newsletters using **MJML** framework, **HTML5, CSS3**.
- Completed role due to overseas death in family during COVID pandemic.

Queensland Department of Transport & Main Roads | Ministerial & Executive Services | Brisbane

Data & Systems Analyst

09/2017 – 10/2018

- Within a close-knit team of three, I produced Excel data analytical reports on departmental performance trends, developed Sharepoint websites for internal procedures and delivered technical support via phone and email for all internal enquiries on departmental document tracking systems.

Support Officer (Legislation Services)

09/2016 – 09/2017

Queensland Department of Justice & Attorney-General | Brisbane Courts Registry

Courts Services Officer

01/2014 – 08/2016

Queensland University of Technology | Student Business Services

Assistant Client Services Officer

11/2007 – 3/2010

Education

Graduate Certificate in Digital Design (Web Screen / Digital Fabrication)

Griffith University

✓ *Grade Point Average 6.3 / 7*

**Bachelor of Information Technology &
Bachelor of Creative Industries (Communication Design)**

Queensland University of
Technology

✓ *Awarded Distinction*
