SOFTWARE DEVELOPER

Over five years of experience delivering business-critical user journeys on web, iOS & Android for Australian start-ups, digital agencies, corporate technology companies.

Professional Experience

Flip Insurance | Sydney

Front-end Developer

09/2023 – 05/2026

- Drove upwards trending insurance sales since 2023 by delivering critical purchase journey iterations and product experiments on browser (**React, Typescript**) and **iOS/Android** mobile app (**Flutter, Dart**), and integrating with **RESTful** backend APIs & external services such as Stripe, Google Maps Javascript API, Box file uploads, Okta.
- To improve overall front-end app stability, I delivered key architectural uplifts to foundation state management in React (**Redux, state machine, Tanstack Query, custom hooks**) and Flutter (**service locators, RxDart streams, Provider MVVM patterns**) following best practice engineering principles.
- Received positive customer feedback and +80 net promoter scores from expanding web and mobile user experience, which included building a mobile-first insurance claims submission flow, a QR-code driven purchase registration feature, mobile push notifications using **React, Flutter** and by accurately translating designs from **Figma**.
- In collaboration with product manager, marketing and backend engineers, I successfully built the customer-facing purchase journey in **React** for HCF's greenfield funeral insurance pilot project. Achievements included a rebuild of HCF's **atomic design component system** and a **custom authentication** flow built on Okta. (www.hcf-funeralinsurance.com.au)
- Improved security, app performance and consistent uptime across three React codebases by owning migration from legacy **Webpack to Vite**, patching **npm** vulnerabilities, adding **software composition analysis** to CI/CD pipeline.
- Integrated **Claude Code** into workflows to accelerate feature delivery and **Vitest** component tests generation, used **MCPs** to derive specifications from 3rd party tooling (Miro, Figma, Jira) and established sensible code quality guardrails using **skills & Claude.md** artefacts.

Yabbr.io | Brisbane

Front-end Developer

10/2022 – 06/2023

- Revamped the entire customer-user experience across the core product suite — an omnichannel chat-email-phone communication platform and customer administration portal — using **Bootstrap** utility framework, **Socket.io** and **Vue**.
- Migrated core product suite from **Vue 2 to Vue 3** and delivered refactoring to improve developer experience on the core product suite codebase.
- Built UI for a greenfield CRM with **Vue, Bootstrap** which included custom data visualisations using **Chart.js** to enable B2B clients to manage complex streams of their customer traffic data.
- First point-of-call for online enquiries and funnelled customer feature requests and production issues to the engineering product roadmap for prioritisation.

Dye & Durham Australia | Brisbane

Junior Software Developer

07/2021 – 08/2022

- Built a greenfield cross-platform **Flutter** interface and atomic design system components for a B2B document verification service supporting Australian government-issued document types as part of a legal practice product suite.
- Delivered bug fixes and **Flutter** feature releases within a **Kubernetes** microservices-based cloud environment.
- Collaborated with product managers, scrum master and other development squads through agile ceremonies to scope requirements and coordinate feature deliveries.

Zeroseven Digital Agency | Brisbane

Front-end Developer

01/2020 – 11/2020

- Built **responsive, WCAG 2.0-compliant** reusable UI components to design & SEO specifications using **Javascript (ES6), JQuery, LESS, HTML5, ASP.NET MVC5 Razor views** and **macro expressions** for websites powered by **Kentico** and **Umbraco CMS**.
- Under the directions of project manager and senior developer, I helped clients in **face-to-face training sessions** to become confident in leveraging Umbraco CMS functionalities to meet their business and marketing needs.
- Built browser-compatible email newsletters using **MJML** framework, **HTML5, CSS3**.

Queensland Department of Transport & Main Roads | Ministerial & Executive Services | Brisbane

Data & Systems Analyst

09/2017 – 10/2018

- Within a close-knit team of three, I was responsible for producing Excel data analytical reports on departmental performance trends for the ministerial office and senior executive leadership team.
- I was the first port-of-call providing technical support via phone and email for all internal enquiries relating to the department's proprietary correspondence tracking system and TRIM file archive system.
- I produced internal training resources including a Sharepoint intranet website and various written references to advise on drafting and escalating official departmental correspondence, appropriate use of document templates and Queensland Government writing style guides.

Support Officer (Legislation Services)

09/2016 – 09/2017

- I provided drafting and proofreading support to the Legislation Services team and other business policy areas progressing legal documents, memoranda, instruments of legislative delegations for approval by the Director-General's office.
- Under the directions of the Manager for Legislation Services, I redesigned the department's Sharepoint 2013 intranet website to provide clear guidance on official parliamentary procedure.

Queensland Department of Justice & Attorney-General | Brisbane Courts Registry

Courts Services Officer

1/2020 – 05/2026

- First port-of-call to advise self-represented litigants, legal practitioners and judge's associates on the telephone and email on court file retrieval, estate applications and referrals to legal assistance.
- Quality-controlled and dispatched high volumes of estate administration grants (probates, letters of administration, reseals of overseas grants) as instructed by the Supreme Court Registrar.
- Assisted the thrice-weekly Corporations Court as the Associate to the Court Registrar by multi-tasking court file retrieval, liaising with solicitors and updating the QCIVIL database with progress of matters.

- Administered daily caseloads of international study applications from initial receipt through to the final enrolment of the applicant by interpreting and adhering to a range of university admission guidelines, faculty requirements, visa policies and Australian Education International (NOOSR) regulations.
- Counseled international applicants, affiliated overseas exchange agencies and internal staff on complex and sensitive university admission-related issues, ranging from visa applications to under/postgraduate study options tailored to individual student requirements.

Tech Stack

Claude Code	Git	Figma
ChatGPT	Jira, Assembla	BrowserStack
		Miro
React	Vite	Notion
Vue	Storybook	
Typescript, Javascript (ES6)	Firebase	Umbraco
Flutter	Netlify	Kentico
Dart	Google Cloud Platform	ASP.NET MVC5
	Codemagic	
SCSS, LESS, CSS (BEM)	LaunchDarkly	MJML email framework
HTML5	Posthog	
Material UI, Bootstrap utilities	Datadog	

Education

Graduate Certificate in Digital Design (Web Screen / Digital Fabrication)

Griffith University

✓ Grade Point Average 6.3 / 7

Bachelor of Information Technology

Bachelor of Creative Industries (Communication Design)

Queensland University of Technology

✓ Awarded Distinction
